

Farmers, village and local produce markets in North Somerset

Local markets are a great way to buy local, fresh, seasonal food and drink - it's a great way to meet the producer and find out more about the products you are buying. Markets take place across North Somerset on a weekly and monthly basis and it's very likely there is one in your local community. By using your local market you are supporting local businesses, the local economy and the local environment – it's a win win!

The Made in north somerset logo is used to show that the majority of produce at these markets is made in North Somerset and the surrounding area. An annual 'Made in North Somerset' festival is held every autumn to specifically promote and celebrate food, drink art and craft producers through events, activities and an annual Showcase market. For more information www.innorthsomerset.co.uk/madein
